Changes to accountability

QMGS Year 9 GCSE information evening
Thursday 15th February 2018

Changes to accountability

- The predictions will be used to ensure that in each subject there is statistical alignment between the new grade 3/4 boundary and the present grade C/D boundary.
- The predictions will be used to ensure that in each subject there is statistical alignment between the new grade 6/7 boundary and the present grade A/B boundary.
- The predictions will be used to ensure that in each subject there is statistical alignment between the new grade U/1 boundary and the present grade G/U boundary.
- The 8/9 boundary will be set in each examination so that 20% of those candidates awarded at least a grade 7 are awarded a grade 9.

Grade boundaries that are not set using statistical rules will be set arithmetically, as now.

Ofqual, September 2014

Thursday 15th February 2018

Potential questions over a change in approach

Q Why has the curriculum been narrowed from two years ago?

- Response to GCSE changes – more content/rigour

Q Why do all students have to take a MFL and are advised to follow Geography or History?

- English Baccalaureate (EBacc)
- The importance of languages

Q Why has more time been given to English and Maths?

- More content/rigour
- Increased importance in accountability measures

Q Are other schools making the same changes?

- Relatively little change at QMGS compared to other schools
- A national move to a more academic approach
- Funding pressures

Q Will these changes lead to the end of the creative subjects?

- A commitment to curriculum breadth
- Increased PAN feeding through
- Positive signs from A level changes
