Transition Tasks

A Level Art

Drawing task

The ability to draw underpins the content of our A level course. To support your transition onto the course the following task will help you practice some of these essential drawing skills.

From life or your own photograph complete three A2 fully rendered drawings. (Please do not trace.) Each are required to depict a single object; for example, an item of packaging.

All need to be competed in a medium that you feel comfortable using and will enable you to complete as realistically as possible. I will be looking for excellent use of tone and ability to record as much detail as possible to create the illusion of a three dimensional object.
